Aditi Kumari Singh.

aditisingh1027

Professional Summary

Undergraduate Computer Science student with knowledge of software engineering, full-stack web development, databases, and scalable application development. Skilled in developing RESTful APIs, database-driven systems, authentication workflows, and role-based platforms using modern web technologies. Experienced in building collaborative full-stack projects with responsive user interfaces and backend service integration. Seeking a Programmer Analyst Trainee role to apply problem-solving and software development skills in enterprise application development.

Education

C. V. Raman Global University

2023 – 2027

Bachelor of Technology in Computer Science Engineering

CGPA: 8.24

Projects

Campusync – Student Engagement & Placement Platform

Ongoing

Live Demo — Frontend Repo — Backend Repo

- Developed a full-stack role-based platform for managing placements, clubs, events, notifications, and student activities using **React.js**, **Node.js**, **Express.js**, and **MongoDB**.
- Designed responsive and interactive user interfaces using **HTML5**, **CSS3**, **JavaScript**, **Tailwind CSS**, and **Material UI** with dashboards for students, faculty, and administrators.
- Implemented secure authentication and authorization using **JWT**, **bcrypt**, session handling, and **Role-Based Access Control (RBAC)**.
- Developed **RESTful APIs** and implemented complete **CRUD operations** for placements, applications, clubs, events, notifications, and messaging modules.
- Designed scalable database schemas, entity relationships, indexing, filtering, and optimized query handling using **MongoDB** and **Mongoose**.
- Integrated cloud-based media upload workflows using **Cloudinary** and backend file handling services.
- Applied modular component-based architecture, debugging, reusable services, and API integration practices to improve maintainability and scalability.
- Collaborated in a two-member development team to design frontend interfaces, backend APIs, database workflows, and role-based application modules.

Technical Skills

Languages: JavaScript, SQL, Python, Java

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Material UI, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MySQL

Core Concepts: DBMS, OOPs, Data Structures & Algorithms, CRUD Operations, API Integration, RBAC, Cloud-Based Storage Integration

Tools: Git, GitHub, VS Code, Cloudinary

Certifications

- AWS Training – Data Engineering on AWS Foundations
- Deloitte Forage – Data Analytics Virtual Experience

Achievements

- Solved 100+ Data Structures and Algorithms problems on LeetCode and HackerRank.
- Participated in hackathons and collaborative software development projects focused on web applications and backend systems.
- Runner-Up – CGU Cup Basketball Tournament (2024–26); Vice Captain, CGU Girls Basketball Team.
